Comments: I vehemently oppose this project & feel it will have terrible long lasting impacts on not only the recreation area that we as families who have raised generations on this lake, but also the environmental impact will be devastating. The Grizzly bears that call this area their home will be eventually killed due to contact with increased people interaction & food attractants with a proposed restaurant. I have fond memories of this special camping place. Where you could row out in the middle of the lake & enjoy the Swan Range on one side & the Missions on the other. Hiking to the falls & stopping to swim at the swimming hole on the way up & back. Changing the simple nature of it will change it for the rich only if it is expanded by a corporation to the size they are proposing. Stop this madness about more is better. Money should not be the sole reason that this place exists. It's magical and unique the way it has been for generations. Common working families who appreciate the simplicity of camping & boating in a pristine area. This project will change the vibration and accessibility of who will come here in the future. Keep Holland Lake & its current buildings & campsites as is & register them as a Historical Site that cannot & should not be developed now or in the future. Keeping this little piece of MT the "best place" as it is and should be!
