Re: Holland Lake Lodge Facility Improvement & Expansion #61746

I am deeply concerned about the Forest Service's proposal to allow a huge expansion of facilities at historic Holland Lake. I am particularly concerned that, according to your scoping documents on the project, "Based on a preliminary assessment, intentions are to categorically exclude the proposed project from documentation in an environmental impact statement or an environmental assessment." That intention is based on the fact that there are already existing facilities - but what is proposed will fundamentally change the nature of this quiet, rustic, fairly secluded area and have significant impacts on its non-human inhabitants.

Sincerely,

Tamara Lewis

Re: Holland Lake Lodge Facility Improvement & Expansion #61746

I am deeply concerned about the Forest Service's proposal to allow a huge expansion of facilities at historic Holland Lake. I am particularly concerned that, according to your scoping documents on the project, "Based on a preliminary assessment, intentions are to categorically exclude the proposed project from documentation in an environmental impact statement or an environmental assessment." That intention is based on the fact that there are already existing facilities - but what is proposed will fundamentally change the nature of this quiet, rustic, fairly secluded area and have significant impacts on its non-human inhabitants.
