

Thank you for the opportunity to comment on the plans for the Stibnite Gold Project. Over the last several years, I've had the opportunity to hear a handful of presentations on the project, sit down with members of Perpetua Resources and observe how the company has lived out its mission as it has grown. It is with this knowledge that I encourage you to move the project forward.

One of the top reasons why I support Perpetua Resources' plans is because it will secure an American source of antimony. The federal government deemed antimony a critical mineral because of its use in the energy and national defense industries. Today, there is no domestic source of this mineral. Most of it comes from China or Russia, which makes our country vulnerable. America's military depend on antimony to protect our country and stay safe. The mineral is used in munitions, military clothing, night vision goggles, infrared sensors and more. It is irresponsible to continue relying on our adversaries to provide us with antimony. I have reviewed the plan and believe the Burntlog option will allow the company to mine safely, minimize the impacts to the environment and help protect our national security.

I urge you to approve Perpetua Resources' project. The Stibnite Gold Project will provide a huge benefit to our community and the local environment and the company has taken the time to reduce its footprint and improve water quality at site. The permitting process is designed to move the best plans forward and I feel that is what we will do with the 2021 Modified Mine Plan.
