

I am writing in support of the Stibnite Gold Project. The project will help restore the site, secure the minerals we need for our national security and strengthen America's supply chains. Thank you for the opportunity to provide my feedback as part of the National Environmental Policy Act.

I am impressed with Perpetua Resources' current dedication to repairing legacy environmental issues at the site from mining activity that took place on and off for more than 100 years. This is a major investment. Government agencies would not have the budget to perform all the necessarily reclamation work. This private/public partnership is the right approach for Idaho and will solve environmental issues while providing the area with a significant economic boost. In reviewing the SDEIS, I am very impressed with the further improvements the company has made to its plan. They eliminated the Fiddle Development Rock Storage Facility, reduced the project footprint again, added more plantings on site to reduce water temperature and outlined additional actions to be taken to improve water quality. It is clear to me we have a path forward that will protect Idaho's environment and allow us to mine a critical mineral our nation is currently lacking.

This Stibnite Gold Project is a huge opportunity for Idaho. Please permit the 2021 Modified Mine Plan and move the project forward so America can reap the positive impacts.
