

Thank you for the opportunity to comment on the SDEIS for the Stibnite Gold Project. This project is important for Idaho's future and our nation's future. Perpetua Resources has a plan to leave the site better than they found it and produce antimony, a mineral we need for our national defense and clean energy future.

The permitting process has made the Stibnite Gold Project better. Perpetua Resources has listened to input from the public and regulators and found ways to reduce its project footprint, improve fish habitat and eliminate the need for long-term water treatment. Reviewing the Burntlog Road option in the SDEIS, it is clear to me the company plans to mine the area responsibly and minimize its environmental impacts. I hope the USFS will move this improved plan forward.

For the above reasons and many more, please move forward with the 2021 Modified Mine Plan for the Stibnite Gold Project as it is important to all Idahoans. After more than 12 years of scientific analysis by the company and six years of regulatory review that the project, we should not have to wait much longer to recognize the project's benefits.
