

I am writing to express my full support of Perpetua Resources and the Stibnite Gold Project. The project would finally address legacy mining issues that have been plaguing the site for decades and help secure the minerals we need for America's future. The company has shown its commitment to Valley County and the state of Idaho and I encourage you to adopt the proposed activities outlined in the company's 2021 Modified Mine Plan during the permitting process.

The Stibnite project is important to me because it will strengthen our national security through the production of antimony. Right now, the U.S. relies on foreign countries for this mineral. These days, I think Americans value a domestic supply chain for such important minerals more than ever. Antimony is used to make electronics and batteries and is also a critical mineral for national defense and the energy industry. With the uncertainties that the Coronavirus brought to our world and current war in Ukraine, I want our country to do everything it can to protect us from the uncertainty of changing markets and trade wars.

I encourage the USFS to move the Stibnite Gold Project forward and permit Perpetua Resources' project as outlined in the 2021 Modified Mine Plan. At this point, the Stibnite Gold Project has been studied and reviewed for years. That is enough. Now, it is time to let Perpetua get to work.
