

I am writing to share my thoughts on Perpetua Resources' Stibnite Gold project. There are many reasons why I am excited for Perpetua's project to come to life. It would provide America with our only mined supply of antimony, a mineral critical to our national defense and energy sectors. I hope through my comments you will understand why I want to see this project move forward.

Our lives depend on mining. We need minerals for our cell phones, computers, cars and pretty much everything in between. While mining is crucial, we cannot sacrifice our environment in the process. Mining must be done responsibly. When the USFS identified Perpetua's improved plan as its preferred alternative, it signaled they believe the company can limit community and environmental impacts and mine. Reviewing the SDEIS, I was pleased to see the preferred alternative would improve water quality conditions in Meadow Creek and the East Fork of the South Fork of the Salmon River by removing the repurposing legacy tailings. The conditions on site are not going to fix themselves. Perpetua Resources is our best bet to improve water quality.

Perpetua Resources wants to invest \$1 billion in our state, bring more than 1,000 jobs to rural Idaho and still provide access to Idaho's public lands. This is the type of project our state needs. After reviewing the project for six years, I highly encourage the U.S. Forest Service to move the project forward with the improvements laid out in the SDEIS.
