Title:

Comments: November 24 2022

Dear Supervisor Jackson,

Please accept these comments on your proposed Forest Resilience and Fuels Reduction Prescribed Fire Project #63166. As you do so, please think about and act in ways that are consistent with these wise words.

"It is horrifying that we have to fight our own government to save the environment."

Ansel Adams

"We must protect the forests for our children, grandchildren and children yet to be born. We must protect the forests for those who can't speak for themselves such as the birds, animals, fish and trees."

Chief Edward Moody

"Any fool can destroy trees. They cannot run away [hellip] God has cared for these trees, saved them from draught, disease, and avalanches [hellip] but he cannot save them from fools"

John Muir from "Save the redwoods, 1900

"God has cared for these trees, saved them from drought, disease, avalanches, and a thousand tempests and floods. But he cannot save them from fools.

John Muir

"The clearest way into the universe is through a forest wilderness"

John Muir

"Of all man's works of art, a cathedral is greatest. A vast and majestic tree

is greater than that."

Henry Ward Beecher

"The Eyes of the Future are looking back at us and they are praying for us to see beyond our own time."

Terry Tempest Williams

Supervisor Jackson, you propose to apply a herbicide to public land that contains the poison glyphosate that's a potent carcinogen. Had Ms. Randall, Mr. Proctor and Mr. Ririe been doing their jobs you would now this.

In 2009 Scientific American published this article

Weed-Whacking Herbicide Proves Deadly to Human Cells

<https://www.scientificamerican.com/article/weed-whacking-herbicide-p/>

One wonders why the invasive vegetation species control experts have ignored this science for 13 years.

.You know there are alternatives that will achieve your noxious weed eradication goals without applying Roundup.

As you will see below, the USDA has been snuggling with the manmade chemical corporations for many decades. A real public servant would have the courage to use chemicals that are less toxic than glyphosate in spite of the agency's silence.

You propose to apply a chemical to national forest land that multiple independent research studies show causes cancer and other serious health issues. The law prohibits federal officials from knowingly putting American citizens in danger.

Supervisor Jackson, I suggest you ask yourself these questions:

- 1) Have I ever seen a picture of a baby born with birth defects?
- 2) Have I watched someone die a painful death from cancer?
- 3) Do I know how difficult it is for autistic people to function normally in our society?
- 4) Can I understand the heartache for a young couple whose first child was taken from them by a miscarriage?
- 5) Do I know anyone who has died from irreparable kidney or liver damage?
- 6) Do I understand how dementia affects the family?
- 7) Can I empathize with someone who has been trying to have a family and is told they are infertile?
- 8) How many premature babies die?
- 9) What condition causes the body to be deprived of oxygen leading to unconsciousness or death by suffocation?
- 10) How do people with neurological disorders deal with life?
- 11) Are you aware that Monsanto spends hundreds of millions \$\$\$\$\$\$ each year polishing their image denying these effects?

As I will show below, hundreds of independent Ph.D. chemists have written literature showing why glyphosate should never be applied anywhere at any time for any reason. Is it worth the risk when there are other ways to kill noxious weeds without killing people? You won't be popular with your employees [hellip] or the judge, when the local public finds out you ignored this warning.

Please do not apply herbicides that contain the chemical glyphosate. I present my reasons below.

Supervisor Jackson, if you would not spray a chemical that might cause cancer on your own property where children and pets might play, you should not decide to contaminate public land with the same chemical. Why would the FDA start testing food for glyphosate if it was safe? See:

FDA to Start Testing Monsanto's Glyphosate in Food, February 19, 2016

<http://readersupportednews.org/news-section2/318-66/35283-fda-to-start-testing-monsantos-glyphosate-in-food>

I don't think you want to spew a known carcinogen on land enjoyed by families and children. Multiple scientific studies conclude even casual exposure to glyphosate causes terrible, health problems in mammals (including humans). This research shows Glyphosate exposure might cause cancer later in life.

Glyphosate was first registered for use in the U.S. in 1974. Please ask yourself if this might be a reason why there is currently a cancer epidemic in America.

Please consider the following online information:

"The public's appreciation of the toxicity of glyphosate-the active ingredient in Monsanto's broad-spectrum herbicide Roundup-is still limited, despite highly damning research being published.

The fact that Monsanto marketed Roundup as "environmentally friendly" and "biodegradable" probably has a lot to do with this general lack of insight.

More people are apt to remember the Roundup commercial than recall the fact that Monsanto was twice found guilty of false advertising of this herbicide. In 2009, a French court again upheld these earlier convictions.

Mounting evidence shows that glyphosate is FAR more toxic than anyone previously suspected, both alone and in combination with other additives (as in the case of Roundup), or in combination with other agricultural chemicals and/or heavy metals.

Dr. Donald Huber, one of the premier plant pathologists in the US, views it far more toxic than DDT. They are spraying nearly ONE BILLION pounds every year on our food crops. That is enough glyphosate to fill 4,000 Olympic sized swimming pools.

Most recently, what's being referred to as "an epidemic" of chronic kidney disease-a mysterious form of toxic nephropathy-striking down farmers in Sri Lanka, India, and Central America's Pacific coastline (El Salvador, Nicaragua, and Costa Rica), has now been traced back to Roundup in combination with contaminated fertilizer."

Herbicides that contain glyphosate are banned in Denmark, England, Italy, El Salvador, Sri Lanka, France, Holland, Austria, Bulgaria, Germany, Greece, Hungary, Ireland, Japan, Chile, South Africa, Luxembourg, Madeira, New Zealand, Peru, South Australia, Russia, France, Switzerland, Columbia, and Costa Rica.

<https://www.timesmojo.com/which-countries-have-banned-roundup/#:~:text=Which%20Countries%20Have%20Banned%20Roundup%3F%201%20Malawi.%202,6%20Kuwait.%207%20United%20Arab%20Emirates.%208%20Bahrain.>

California agency issues intent to list glyphosate as carcinogen

<https://www.agri-pulse.com/articles/5943-california-agency-issues-intent-to-list-glyphosate-as-carcinogen>

Monsanto Is Suing California for Trying to Inform People That
Roundup Causes Cancer

By Rebecca Spector, Center for Food Safety March 7, 2016

<https://www.centerforfoodsafety.org/issues/311/ge-foods/blog/4275/monsanto-is-suing-california-for-trying-to-inform-people-that-roundup-causes-cancer>

The EPA has been in Bed with the Manmade Chemical Corporations for Decades. They will finally be brought to Justice.

Please read this article: "Lawsuit Targets EPA's Failure to Release Public Records on Toxic Herbicide"

Excerpt: "The EPA has yet to fully comply with a Freedom of Information Act request filed by the Center two years ago seeking information about the EPA's decision to register the pesticide cocktail. Today's lawsuit seeks full public disclosure of those documents."

http://www.biologicaldiversity.org/news/press_releases/2016/enlist-duo-02-03-2016.html

Glyphosate is especially toxic to children

Had you consulted an outside authority whose herbicide knowledge is not based on USDA lies you would know exposure to glyphosate affects children much more than adults. Here's what a knowledgeable herbicide consultant would have told you:

Glyphosate contamination will cause 50% of children to be autistic by 2025, according to researcher

Alleged Glyphosate Poisoning Kills 2 Children, 33 More in Hospital

<http://naturalsociety.com/alleged-glyphosate-poisoning-kills-2-children-33-hospital/>

Are Your Children Roundup-Ready?

<http://www.cornucopia.org/2015/10/are-your-children-roundup-ready/>

Caring, compassionate, intelligent people would not need more evidence to stop applying herbicides that contain glyphosate. For others, I offer the following information.

This just in

Glyphosate Induces Antibiotic Resistance in Deadly Hospital-Acquired Infection

Published by Beyond Pesticides, November 8, 2022

<https://beyondpesticides.org/dailynewsblog/2022/11/glyphosate-induces-antibiotic-resistance-in-deadly-hospital-acquired-infection/?emci=c80ecea4-545f-ed11-819c-002248258d2f&emdi=bc64a40c-7e60-ed11-ade6-14cb6534a651&ceid=16262>

Excerpts:

"While federal regulatory agencies continue ignore the role of pesticides in the development of antibiotic resistance, it is critical for states and localities to take action to protect their most vulnerable both from toxic exposure to these herbicides and the multitude of indirect effects caused by their use. This is all happening as antibiotic resistance is rising to dangerously high levels in all parts of the world, according to the World Health

Organization. In the May 1, 2022 issues of the Bulletin of the World Health Organization, Samira Choudhury, PhD, et al. writes, "Often referred to as the silent pandemic, antimicrobial resistance claims the lives of over 700,000 people annually." The authors continue, "A study suggests that if no actions are taken, antimicrobial resistance will cause 10 million deaths per year by 2050 and an economic impact of over 100 trillion United States dollars." "

Indian Government Restricts Use of Glyphosate in Massive Blow to Agrichemical Lobby

Published by Sustainable Pulse, October 28, 2022

<https://sustainablepulse.com/2022/10/28/indian-government-restricts-use-of-glyphosate-in-massive-blow-to-agrichemical-lobby/#.Y1wWNP3MK1s>

Excerpts:

"The Indian government has restricted the use of glyphosate-based herbicides due to the risks to human and animal health. On Tuesday the Agricultural Ministry stated in a notification that "the use of glyphosate is prohibited and no person, except Pest Control Operators (PCOs), shall use glyphosate." "

"Kerala, Punjab, Telangana and Andhra Pradesh are among the major agriculturally important states that have banned the use of glyphosate citing its adverse impact on human health, according to Business Standard."

Glyphosate Based Herbicides and Bee Health: The American Bumble Bee

Published by Beyond Pesticides, October 20, 2022

<https://beyondpesticides.org/dailynewsblog/2022/10/glyphosate-based-herbicides-and-bee-health-the-american-bumble-bee/?emci=e92cbe40-b554-ed11-819c-002248258e08&emdi=ef9bd4f8-6355-ed11-819c-002248258e08&ceid=16262>

Excerpts:

"The study concludes, "[O]ur results emphasize the imperative need to direct our collective research focus on the substantial, complicated, and ecologically relevant risk scenarios rather than lethal doses alone. These risks are not limited to agroecosystems because glyphosate residues are near-ubiquitous in wild environments as well, and a vast majority of plant species are animal pollinated. Thus, sublethal consequences of GBHs should be considered not only in future research but also in public discussion, decision making, and development of environmentally friendly pesticides." "

Glyphosate Linked to Lower Birth Weight and More Intensive Care Cases in Study on US Mothers

Published by Sustainable Pulse, Oct 19 2022

https://sustainablepulse.com/2022/10/19/high-levels-of-glyphosate-associated-with-lower-birth-weight-and-more-intensive-care-cases-in-midwest-mothers-study/?utm_source=newsletter&utm_medium=email&utm_campaign=glyphosate_gmos_and_pesticides_weekly_global_news_bulletin&utm_term=2022-10-21#.Y1Mm0P3MK1s

Excerpts:

"Indiana University School of Medicine researchers are learning more about the effects of herbicide exposure

during pregnancy, finding glyphosate in 99 percent of the pregnant women they observed in the Midwest. In the study, published recently in Environmental Health, higher glyphosate levels were associated with lower birth weight and may also lead to higher neonatal intensive care unit admission risk.

This is the second small-scale study the researchers have conducted with significant findings. The team's previous study, published in 2018, was the first study to confirm glyphosate in 93 percent of pregnancies which found associations with shortened pregnancies. Other recent studies have also confirmed their findings."

Chemical Alterations in the Body from Glyphosate-Based Herbicide During Perinatal Exposure Induces Chronic Liver Injury

Published by Beyond Pesticides, October 13, 2022

<https://beyondpesticides.org/dailynewsblog/2022/10/chemical-alterations-in-the-body-from-glyphosate-based-herbicide-during-perinatal-exposure-induces-chronic-liver-injury/?emci=06a84afc-424f-ed11-819c-002248258e08&emdi=c04e4eaa-e14f-ed11-819c-002248258e08&ceid=16262>

Excerpt:

"(Beyond Pesticides, October 13, 2022) Offspring's exposure to glyphosate-based herbicides (GBHs) preceding and proceeding birth (perinatal) induces liver damage. A study published in Toxicology and Applied Pharmacology demonstrates the role excess iron in the body from GBH exposure plays in liver toxicity via an increased uptake of calcium and oxidative stress. The liver, the largest solid organ in the human body, is an essential part of the digestive system, responsible for blood detoxification, nutrient metabolization, and immune function regulation. The rates of chronic liver diseases are increasing, representing the second leading cause of mortality among all digestive diseases in the U.S."

Toxic Legacy How the Weedkiller Glyphosate Is Destroying Our Health and the Environment

By Stephanie Seneff, Ph.D.

Published by Chelsea Green Publishing Inc., July 1, 2021

<https://www.amazon.com/Toxic-Legacy-Weedkiller-Glyphosate-Environment/dp/1603589295>

Excerpt:

"This was an eye-opening teardown of the pesticide glyphosate (more commonly known as RoundUp). Within the first two or three chapters Seneff has convinced you that it is incredibly toxic stuff - and likely contributing to a large amount of chronic health conditions that have increased in prevalence over the last 30ish years. She cites hundreds of scientific papers backing this up, and then dives deep (very deep) into the biological mechanisms by which this is all happening inside our bodies.

The book gets increasingly focused on biology (and increasingly difficult for non-biologists) as you go. Starting with the big picture: how glyphosate impacts health in various animal and human studies (accessible to anyone), and then drilling into how the specific pathway it targets causes problems for us (because it exists in our microbes), and then finally getting into the depths of amino-acid substitutions, and how the shape and makeup of a particular protein can make it more susceptible to glyphosate - thus explaining how it manages to affect our bodies in all these different ways.

The book is worth reading just for the first part, and if you want to deep dive into the biology it's all there for you,

though you will likely need a strong cup of coffee and a notebook to make sense of it if you're not a biologist.

If you get overwhelmed by the science - and I did at times - I recommend skipping ahead to the last chapter where Seneff outlines what we can do with the situation we're in, and how we as individuals can improve our health with simple changes in our diets and behavior. Since reading this book I've tried much harder to eat as much organic, raw produce as is practical for our family.

I highly recommend the book and it will change your perspective on food. Just don't be surprised if you have trouble making it through the whole thing!"

EPA Finds Glyphosate Is Likely to Injure or Kill 93% of Endangered Species

By Lori Ann Burd

Center for Biological Diversity news release, November 25, 2020

Excerpt:

WASHINGTON- The Environmental Protection Agency released a draft biological evaluation today finding that glyphosate is likely to injure or kill 93% of the plants and animals protected under the Endangered Species Act.

"The long-anticipated draft biological evaluation released by the agency's pesticide office found that 1,676 endangered species are likely to be harmed by glyphosate, the active ingredient in Roundup and the world's most-used pesticide.

The draft biological opinion also found that glyphosate adversely modifies critical habitat for 759 endangered species, or 96% of all species for which critical habitat has been designated.

"The hideous impacts of glyphosate on the nation's most endangered species are impossible to ignore now," said Lori Ann Burd, environmental health director at the Center for Biological Diversity. "Glyphosate use is so widespread that even the EPA's notoriously industry-friendly pesticide office had to conclude that there are hardly any endangered species that can manage to evade its toxic impacts."

Hundreds of millions of pounds of glyphosate are used each year in the United States, mostly in agriculture but also on lawns, gardens, landscaping, roadsides, schoolyards, national forests, rangelands, power lines and more."

After reading the information below any caring human being would use mechanical and manual methods and forget glyphosate application. I hope you and your IDT members stop using Roundup at home.

This is the most Important thing you will Read in these Comments

The research conclusions of hundreds of independent scientists show glyphosate exposure causes Non-Hodgkin's lymphoma (a type of cancer that begins in the lymphatic system), Birth Defects, Miscarriage, DNA damage, cell death, GMO's & Neurological Disease: ADHD, Autism, Alzheimer's, Schizophrenia, Bipolar disorder, Kidney and Liver Damage.

The USFS Regional Invasive plant coordinators for R-4 are either not aware of [hellip] or reject best science conclusions not generated by USDA-approved scientists. They know the USDA has been sleeping with the pesticide/herbicide manufacturers (including Monsanto) for decades. Thus, in order to not jeopardize their jobs they obediently feed forest employees, untrue, fabricated, cooked up information showing glyphosate exposure is nothing to be concerned about.

Monsanto can hire the best attorneys money can buy. If Monsanto is a reputable, trustworthy corporation why would the judge order Monsanto to pay the plaintiffs over \$12 billion based on 5 jury trials: 1 in 2018, 2 in 2019, 1 in 2020 and 1 in 2021? Another trial is scheduled for April 2022.

Monsanto's Court Loss --- August 2018

"In July 2018, Dewayne Johnson (a former school groundskeeper) was diagnosed with non-Hodgkin's lymphoma. He sued Monsanto alleging the chemical glyphosate (an ingredient in Roundup) caused his cancer. Mr. Johnson used Roundup as part of his job. On August 10, 2018 a jury in San Francisco delivered a verdict in Mr. Johnson's favor. The judge ordered Monsanto to pay Mr. Johnson \$289 million in total damages."

Here's a link to the verdict:

San Francisco Jurors Hear Hours of Scientific Data About Herbicide's Link to Cancer

<https://www.law.com/therecorder/2018/07/09/san-francisco-jurors-hear-hours-of-scientific-data-about-herbicides-link-to-cancer/?slreturn=20180713081135>

Monsanto's Court Loss --- March 2019

"On March 27, 2019 a San Francisco jury said Monsanto (now owned by BayerAG) was liable for Mr. Edwin Hardeman's non-curable cancer called non-Hodgkin lymphoma. The judge ordered Monsanto to pay Mr. Hardeman \$200 million."

Monsanto seeks "emergency" delay for St. Louis trial, March 24, 2022

"Monsanto on Thursday asked a St. Louis judge to delay the start of a trial over claims brought by three men alleging exposure to Monsanto's glyphosate-based herbicides, such as the popular Roundup brand, caused them to develop non-Hodgkin lymphoma.

Opening statements in the case of Neal v. Monsanto are expected next week. But on Thursday morning Monsanto requested a continuance "due to exigent circumstances." The company did not detail its reasons in the filing."

Here's a link to the information:

<https://careygillam.substack.com/p/monsanto-cites-emergency-in-seeking>

Court rejects Trump-era EPA finding that weed killer safe, June 17, 2022

"A federal appeals court has rejected a Trump administration finding that the active ingredient in the weed killer Roundup does not pose a serious health risk and is "not likely" to cause cancer in humans."

"The California-based 9th U.S. Circuit Court of Appeals ordered the Environmental Protection Agency to reexamine its 2020 finding that glyphosate did not pose a health risk for people exposed to it by any means - on farms, yards or roadsides or as residue left on food crops."

Here's a link to the information:

<https://abcnews.go.com/Business/wireStory/court-rejects-trump-era-epa-finding-weed-killer-85474509>

U.S. Supreme Court rejects Bayer bid to nix Roundup weedkiller suits, June 21, 2022

"WASHINGTON, June 21 (Reuters) - The U.S. Supreme Court on Tuesday rejected Bayer AG's (BAYGn.DE) bid to dismiss legal claims by customers who contend its Roundup weedkiller causes cancer as the German company seeks to avoid potentially billions of dollars in damages.

The justices turned away a Bayer appeal and left in place a lower court decision that upheld \$25 million in damages awarded to California resident Edwin Hardeman, a Roundup user who blamed his cancer on the pharmaceutical and chemical giant's glyphosate-based weedkillers."

Here's a link to the information:

<https://www.reuters.com/legal/government/us-supreme-court-rejects-bayer-bid-nix-roundup-weedkiller-suits-2022-06-21/>

Monsanto Roundup Lawsuit Update, August 26, 2022

"As of May 2022, Monsanto has reached settlement agreements in nearly 100,000 Roundup lawsuits. Monsanto paid approximately \$11 billion. Bayer has accomplished this by negotiating block settlement arrangements with plaintiffs' lawyers who have large numbers of cases in the litigation.

Although these settlements account for nearly 80% of all pending Roundup claims, there are still about 26,000-30,000 active Roundup lawsuits. Most lawsuits have been filed in state court. But there are still over 4,000 claims in the MDL Roundup class action lawsuit pending in California.

New Roundup lawsuits continue to get filed regularly. Our Roundup attorneys get calls and online contact forms from Roundup victims with NHL almost every day."

Why would legal firms spend the money to buy

ads on radio and TV offering to represent people

who had been harmed after using Roundup

if it did not cause cancer?

Please have the courage to read them all.

Supervisor Jackson, I ask you and your IDT members to have the courage to read the science conclusions in Opposing Views Attachment #9.

Reckless Endangerment.

"Reckless endangerment is a crime consisting of acts that create a substantial risk of serious physical injury to another person. The accused person isn't required to intend the resulting or potential harm, but must have acted in a way that showed a disregard for the foreseeable consequences of the actions. The charge may occur in various contexts, such as, among others, domestic cases, car accidents, construction site accidents, testing sites, domestic/child abuse situations, and hospital abuse."

<https://definitions.uslegal.com/r/reckless-endangerment/>

Here is a High Country News article about a USFS burn boss who was arrested for letting an RX fire burn into private land which risked people's lives:

USFS burn boss arrested after prescribed fire burns private land

https://www.hcn.org/articles/north-wildfire-usfs-burn-boss-arrested-after-prescribed-fire-burns-private-land?utm_source=wc1&utm_medium=email&utm_campaign=2022-10-21-Newsletter

Failure to tell the public this chemical will not be applied to vegetation in your forest leaves the door open for you to apply glyphosate.

Sincerely,
