

Thank you for the opportunity to comment on the SDEIS for the Stibnite Gold Project. This project is important for Idaho's future and our nation's future. Perpetua Resources has a plan to leave the site better than they found it and produce antimony, a mineral we need for our national defense and clean energy future.

Everyone who cares about Idaho's fish populations should take notice of some of regulators' conclusions in the SDEIS. Importantly, the SDEIS states by providing volitional passage for fish, Perpetua will have a beneficial impact on fish populations within the vicinity of the mine. Right now, the abandoned Yellow Pine Pit currently blocks fish access to the East Fork of the South Fork of the Salmon River. Fish will continue to be blocked from high quality habitat unless we let Perpetua Resources move forward with its plan. We should allow Perpetua Resources to mine at Stibnite, so we can help fish, secure American supply chains and provide family-wage jobs to Idahoans.

Perpetua Resources wants to invest \$1 billion in our state, bring more than 1,000 jobs to rural Idaho and still provide access to Idaho's public lands. This is the type of project our state needs. After reviewing the project for six years, I highly encourage the U.S. Forest Service to move the project forward with the improvements laid out in the SDEIS.
