

I am writing to share my thoughts on Perpetua Resources' Stibnite Gold project. There are many reasons why I am excited for Perpetua's project to come to life. It would provide America with our only mined supply of antimony, a mineral critical to our national defense and energy sectors. I hope through my comments you will understand why I want to see this project move forward.

The EIS document estimates that the project will generate \$29.4 million in taxes annually and create thousands of jobs for Idahoans and nationwide. I reviewed section 21 which summarizes the beneficial economic impacts from the project. The 2,690 jobs created by the mine during operations annually, and almost 5,000 jobs created during construction, would be a huge benefit to the local and state economies. Moreover, these would be high paying jobs offering good benefits and supporting workers families. This is exactly the kind of economic incentive that is needed in rural Idaho. The McCall area can't make it on tourism alone.

The Stibnite Gold Project is the type of project our state needs. It has been in regulatory review for the past six years. During this time, public comments and scientific analysis has helped to improve the plan. But now it is time to move it forward. I highly encourage the U.S. Forest Service to permit this project, using the 2021 Modified Mine Plan presented by Perpetua Resources in the SDEIS, as expeditiously as possible.
