

This letter is to express my support of Perpetua's Stibnite Gold Project. America needs this project to be permitted. It would produce our country's only source of antimony, a mineral we need for a secure and sustainable future. I hope after reading my thoughts you will understand why my support for this project is so strong.

The SDEIS concludes there will be net benefits associated with the Stibnite Gold Project. Some of those benefits will occur before mining even starts. For example, Perpetua Resources will construct a fishway that allows fish to travel to upstream habitat that they have been unable to reach for decades. Because of this the SDEIS said the greatest benefit to Chinook salmon and steelhead passage will occur during construction, when the fishway is built. Perpetua eventually plans to restore the East Fork of the South Fork of the Salmon River, so access to upstream waters is permanently restored for fish. I want to see the conditions at Stibnite improve. I know Perpetua Resources can make it happen.

Perpetua Resources wants to help America secure a domestic supply of the critical mineral antimony and clean up a brownfield site. They've made great improvements to the project from the original documents they submitted – this shows the permitting process has done its job. It is time to permit the Stibnite Gold Project and continue to move this important project forward.
