

I am proud to welcome Perpetua Resources into our state and proud to support the Stibnite Gold Project. The project will produce America's only source of antimony, a mineral our national security and clean energy future depends upon, and leave the site in better condition than it is today. I hope you will take the time to consider my comments on why you should move to permit the project.

In reviewing the SDEIS, it is clear to me Perpetua has been thoughtful on how to minimize its impacts during mining. For example, the company is going to construct a passageway to reconnect fish to upstream habitat before mining even begins. Fish have not been able to swim past the Yellow Pine pit for more than 80 years. The analysis in the document says this will help limit the impacts of habitat reduction for fish. We need the minerals from the Stibnite Gold Project and I believe the company has demonstrated they can mine safely and protect the environment.

Reviewing Perpetua Resources' improved plans it is clear to me the company really believes in taking care of the environment and keeping the community safe. That is why they reduced water temperatures, improved water quality and shrunk the project footprint by 13 percent. I urge you to trust in your own review process and permit the Stibnite Gold Project.
