

I am writing to share my thoughts on Perpetua Resources' Stibnite Gold project. There are many reasons why I am excited for Perpetua's project to come to life. It would provide America with our only mined supply of antimony, a mineral critical to our national defense and energy sectors. I hope through my comments you will understand why I want to see this project move forward.

The Stibnite Gold Project will not only provide American jobs for the local economy, and beyond, but it will clean up an environmental mess that the area was plagued with many years ago. A cleaner environment, American jobs and much needed American supply of minerals to support our technology can all be accomplished, in this one project.

It is time to move this project forward to a final record of decision.
