

Ms. Linda Jackson, Payette Forest Supervisor
Stibnite Gold Project
500 N. Mission Street, Building 2
McCall, Idaho 83638

Dear Ms. Jackson,

I am writing to share my thoughts on Perpetua Resources' Stibnite Gold project. There are many reasons why I am excited for Perpetua's project to come to life. It would provide America with our only mined supply of antimony, a mineral critical to our national defense and energy sectors. I hope through my comments you will understand why I want to see this project move forward.

I am impressed with Perpetua Resources' current dedication to repairing legacy environmental issues at the site from mining activity that took place on and off for more than 100 years. This is a major investment. Government agencies would not have the budget to perform all the necessarily reclamation work. This private/public partnership is the right approach for Idaho and will solve environmental issues while providing the area with a significant economic boost. In reviewing the SDEIS, I am very impressed with the further improvements the company has made to its plan. They eliminated the Fiddle Development Rock Storage Facility, reduced the project footprint again, added more plantings on site to reduce water temperature and outlined additional actions to be taken to improve water quality. It is clear to me we have a path forward that will protect Idaho's environment and allow us to mine a critical mineral our nation is currently lacking.

Reviewing Perpetua Resources' improved plans it is clear to me the company really believes in taking care of the environment and keeping the community safe. That is why they reduced water temperatures, improved water quality and shrunk the project footprint by 13 percent. I urge you to trust in your own review process and permit the Stibnite Gold Project.

Appreciate your efforts,

Amanda J. Boley
