

I am writing to express my views on Perpetua Resources' Stibnite Gold Project. The opportunity presented by the project is compelling for many reasons and I am committed to seeing come to fruition. This is the best opportunity to clean up legacy tailings and waste, reconnect fish to miles of spawning grounds that they have been blocked from for 80 years and restore a river. Without Perpetua Resources, the site will likely never get the environmental attention it deserves.

Idaho is known for its outdoor recreation opportunities, so I understand people's concerns over how the Stibnite Gold Project would impact local tourism. However, the USFS' previous analysis concluded the project would have negligible socioeconomic impacts to the region's recreation tourism sector. So, I feel comfortable supporting the project and the other economic benefits it would bring to our region, including 500+ well-paying jobs, a boon to the state's tax-base and millions more dollars circulating in our local economy. This is our best chance to restore the abandoned Stibnite Mining District, improve regional water quality and secure an American source of antimony. I hope we take advantage of the opportunities the Stibnite Gold Project presents.

Reviewing Perpetua Resources' improved plans it is clear to me the company really believes in taking care of the environment and keeping the community safe. That is why they reduced water temperatures, improved water quality and shrunk the project footprint by 13 percent. I urge you to trust in your own review process and permit the Stibnite Gold Project.
