

Thank you for the opportunity to provide feedback on the Stibnite Gold Project as part of the National Environmental Policy Act. I believe the project can help stop America's import reliance on antimony and address legacy impacts in the historic Stibnite Mining District. I hope my letter will help as you evaluate the recently published SDEIS.

In reviewing the SDEIS, it is clear to me Perpetua has been thoughtful on how to minimize its impacts during mining. For example, the company is going to construct a passageway to reconnect fish to upstream habitat before mining even begins. Fish have not been able to swim past the Yellow Pine pit for more than 80 years. The analysis in the document says this will help limit the impacts of habitat reduction for fish. We need the minerals from the Stibnite Gold Project and I believe the company has demonstrated they can mine safely and protect the environment.

Please move the Stibnite Gold Project forward, especially now that the public has had multiple opportunities to provide feedback and regulators have been analyzing Perpetua Resources' plans for six years. The review process has improved the project and now it is time to make it a reality.

Deborah Johnston
