Comments: SIS-3_River Complex Risk Reduction Project

Good Afternoon Daniel,

Thank you for the opportunity to review the River Complex Risk Reduction Project. Caltrans District 2 staff would like to provide the following comments:

Work within Caltrans ROW will require a Caltrans Encroachment Permit. The permit will make it necessary to conduct a CEQA analysis as well as NEPA.

Caltrans culverts will need to be protected for several years from plugging due to increased debris from logging or other work. A file is attached with several concepts for larger debris. A settling basin for fine particles may also be necessary. It may also be necessary to remove the structures at a future date.

Thank you again for the opportunity to review and comment.

Thank you,

Cherie Clark
