First name: Yuka

Last name: Jenkins

Organization: MountainWest Pipeline, LLC

Title: Sr. Land Agent

Comments: Dear Mr. Ryan Nehl,

We, MountainWest Pipeline, LLC, fka Questar Pipeline Company, holds several ROW Grants in the Skyline Project Areas identified in the and the map dated September 21, 2023. We maintain and operate several natural gas high pressure pipelines within the project area. Our concerns and comments are listed below.

a. Engineering working in conjunction with Operation would need to review any proposed crossings (wheeled and tracked vehicles)

b. FS needs to be specific where it's proposing to burn in relation to MountainWest' assets. We have the following facilities within the project area.

i. Pipelines (as you've identified)

ii. Valve assemblies

iii. Meter station

iv. Communication equipment

v. Cathodic protection equipment & test leads

vi. Thermogens (for cathodic protection)

vii. Numerous pipeline markers

c. Need more information concerning the impact of the proposed project to our access roads and Rights of Ways

d. Reminder to please always use the One Call 811 (Blue Stakes) service before any excavation, ground disturbance and/or use equipment to ensure that our inspector is on site while working within our ROW.

We ask that more specific plans and proposed activities across or near our facilities be provided so that we can review the impact to our ROWs and crossing of our ROWs. We will be more than happy to assist and provide information in ensuring that the proposed project takes place successfully.

Best Regards,

Yuka
