GATEWAY TO THE FLATTOPS

October 24, 2023

Dear Sir or Madam:

The Town of Yampa would give its thoughts on the proposed management actions to improve public and firefighter safety by reducing fuel hazards and increasing forest health and regeneration on approximately 10,917 acres in the southern portion of the district. The Town supports firefighter safety by reducing fuel hazards, improving forest health and regeneration, and improving the management of the forest transportation system in the project area. As this may not affect the Town on a large scale, there are positive aspects logging and increased traffic to our local businesses would bring. Concerns that have risen are that the additional traffic and potential air quality impact related to equipment and related project burning would possibly leave negative impacts.

The opportunity to give our feedback is greatly appreciated.

Sincerely,

Sheila Symons
Town of Yampa Administrator/Clerk
