USFS – Malheur National Forest

I'm offering the following comments on the Austin Project:

No roads will be closed to citizens after the project is completed. Access to our forests is important to citizens and especially for fire fighting efforts.

Salvage of valuable timber resources will be a part of the project once completed. Wind thrown trees have a value that should not be ignored. Citizens have shown in the past innovated ways to remove these green needled trees with the USFS and citizens realizing a value.

This project will be a benefit to the Malheur Forest and the citizens of Grant County. Do Not ignore citizens rights and benefits.

A handwritten signature in dark ink, appearing to read "Dave Traylor". The signature is fluid and cursive, with a long, sweeping underline that extends to the right.
