Title:
Comments: The attached documents include both raw and summarized survey results from the community-hosted surveys that were made publicly available during the March 23-May 6, 2026 Tongass Forest Plan Revision comment period. The surveys were hosted on three different webpages, including the Sustainable Southeast Partnership, Southeast Conference, and Juneau Economic Development Council, and made available via QR code at USFS-hosted community meetings across the region. These surveys were provided as the option for input if people could not or did not want to use the provided tablets during the community meetings. The questions used in the surveys target the same information requested in the official USFS tablet surveys, but were edited for easier comprehension and to limit some of the planning-associated jargon. The raw results have been unaltered except for the removal of personally identifying information.

The survey results were synthesized at 5pm Alaska time on May 6 so they could be submitted via the CARA portal in advance of the comment deadline. Additional responses after that time will be provided to the USFS in a final update.

Attached:
1. Raw survey results for plan content
2. Raw survey results for management areas
3. Summary of survey results

Thank you for accepting these survey responses from engaged community members across the region. We appreciate the opportunity to facilitate this additional input.
