Title:

Comments: Please use better alternative herbicides to glyphosate and other conventional products where you can. Please look into bioherbicides such as FireHawk Bioherbicide because it does not pose a risk to the environment - and especially the precious waterways and lakes of Utah. Please think of the runoff potential and the environmental risks, and opt for herbicides that have a lower impact on the environment. Forests can be managed responsibly. Please do not use glyphosate on the Utah forests. Thank you.
