Title:

Comments: The forests in our country are vital for our environment they keep our air healthy

They house many many animals and insects that are vital to our food system

They help us with finding peace helping some with mental health and anxiety issues

As their serene views smells and silence which is becoming harder and harder to find

In our world. Why does this administration want to destroy nature?

Why are we letting this happen.

We visit this area 5-10 times a year. It has helped me with grieving the death of my dad

And I imagine it has helped many many other people

Maybe they should go visit and just sit on the river

On Bear Notch Rd or take in the many many beautiful breathtaking views

Please stop destroying the land we have left. I really would like my grandchildren to

Have the peace and tranquility I find in this beautiful area

Thank you
