Comments: Forest Plan Revision

As a member of Friends of the Clearwater, I have just received and read their call to action...and I agree with them.

Wilderness is a wonderful thing. Natural processes have a better record than does the agency in creating diverse forests.

Water quality and wildlife habitat standards should be enforceable and non-discretionary without loopholes.

And I would recommend as wilderness/roadless areas Pot Mountain, Weitas Creek, Meadow Creek, and Gospel Hump.

Thanks...Bill Caldwell MD
